Dear Mr. Eichler:

On September 18, 2001, Mr. Jim Patterson, Plant Engineer, escorted me through the HPM Plant #1 facility. The purpose for my site visit was to inspect the HPM Plant #1 pretreatment system per the requirements of the Indirect Discharge Permit. HPM Plant #1 pretreatment system was found disconnected from the sanitary system of Mt. Gilead.

Mr. Patterson informed me that the Plant #1 building was for sale and that no production which discharged to the sanitary system was in operation.

To satisfy the conditions of the Indirect Discharge Permit (IDP) for Plant #1, Ohio EPA will need a letter with the authorized signatory for revocation of the IDP

My report for the September 18, 2001 inspection is enclosed.

If you have any questions, please call me at (614) 728-3852.

Yours truly,

CRO Notification

Mr. Richard Eichler
Taylor Industrial Services
HPM Division

Mt. Gilead, OH 43338

Dear Mr. Eichler:

Per our telephone conversation on this same day, please find enclosed Ohio EPA's *Cessation of Regulated Operation (CRO) Manual*. During this discussion, you informed me that production operations at the HPM Plant 1 facility located at 394 Lincoln Avenue in Mt. Gilead, OH would be closing, with all operations ceasing, in the near future.

Based on your Emergency Planning and Community Right-to-Know Act filing, received February 21, 2001 by Ohio EPA, the HPM Plant 1 facility would be subject to the CRO requirements.

Please review the manual and then complete and submit the forms included, as necessary. I hope this manual will easily provide you with the information and documentation necessary to fulfill your requirements.

For your information, the hazardous waste identification number assigned to the Plant 1 facility has already been deactivated, per Ohio EPA letter dated May 24, 1993.

Should you have any questions, I can be reached at the letterhead address or by telephone at (614) 728-5037.

Respectfully,

Randy Sheldon
